ABOUT ME

I am an AI Engineer. I am here to contribute my machine learning and Artificial Intelligence Skills to solve real life problems in tech world. I am proficient in developing AI models. Here to change tech landscape

EDUCATION

June-2023 - Present
Saurashtra University

Bachelor of Computer Applications

EXPERIENCE

January-2025 - Present

Unified Mentor

Machine Learning Engineer
- Developed **ML** models using **NLP**.
- Learnt about **EDA** and **FeatureEngineering**.
- Implemented projects to solve **classification** and **regression** problems. using **MachineLearning** Algorithms.
- Implemented **UnsupervisedLeaning** algorithms for **Visualization**.

SKILLS

Programming Language: Python, Javascript
Data Analysis : Pandas, Numpy, matplotlib, seaborn.
Tools and Platforms : Langchain, Huggingface, Phidata, Github, Dockers, AWS.
Frameworks: Flask, Django, Streamlit, ReactJS, NodeJS, NextJS
Databases: SQL, MongoDB, VectorDB

PROJECTS

Cyber Agent *View*
- I implemented this AI powered Cyber Security Agent that gives real time news of latest cyber attacks, It can give vulnerabilities by service versions and search about vulnerabilities on web.
- I used Phidata, Python programming, Prompt Engineering, AI agents workflow

MedicalGenAI *View*
- I implemented AI powered medical chatbot which can response to user about medical related topics
- I used EDA Gemini API Python Programming, Prompt engineering to build this

KEY ACHIEVEMENTS

Data science, Machinelearning, DL, NLP,Bootcamp *Link*
